INSTEAD of trekking through multiple Asian countries to learn about the culture, Mazenod College students brought Asia to them.

The Year 9 students packed up the sporting equipment and transformed the school gymnasium into an Asian marketplace on Wednesday, November 20, as part of the Society and Environment curriculum.

Students set up more than 40 stalls each representing a different country in Asia including Japan, India, China, Turkey, Indonesia, The Philippines and Vietnam and offered national dishes.

They researched each country to discover and appreciate the cultural diversity, geography, economies, perceptions and links with Australia.

Society and Environment teacher Geoff Stallard said students enjoyed the opportunity to share their learning experiences.

It is an annual event at the school.
